

MedAide AI - Pitch Slides (Futureinnovatees)

Slide 1 — Problem

- ▶ Busy healthcare students struggle to find targeted resources and balance wellbeing during intense study periods.
- ▶ Existing platforms are generic, not personalized to weak topics or immediate wellness needs.

Slide 2 — Solution (MedAide AI)

- ▶ An intelligent study assistant that recommends targeted learning resources and integrates simple wellness actions.
- ▶ Key MVP features: topic-guided resource recommendations + a wellness break scheduler.

Slide 3 — Demo Flow

1. User selects “weak topic” (e.g., “Cardiology: ECG Basics”) and difficulty level.
2. System returns a recommended resource from curated JSON (Video/Article/Quiz).
3. User logs mood: system offers a short wellness tip or schedules
